

A2 Unit G486: Practical Skills in Physics 2

Very similar to G483 that you have already completed, this unit develops practical and investigative skills developed within contexts encountered during A2 Physics. You carry out the tasks under controlled conditions in lessons. These will then be marked by your teacher using a mark scheme provided by OCR.

There are three different type of task:

- Qualitative task [10 marks]
- Quantitative task [20 marks]
- Evaluative task [10 marks]

Candidates may attempt more than one task from each category (up to a maximum of three tasks) with the **best** mark from each category being used to make up the overall mark.

The Practical Skills Handbook Chapter 10 is essential reading to help prepare you for these tasks.
